& Purifies

**COMAP**  
SOLUTIONS FOR EFFICIENCY

In my home,  
our water  
is of high  
quality

### Did you know?

On average, we consume 140 litres of water per day, per person, for cooking, drinking, hygiene or household tasks.

Water is an essential part of our everyday life. Water quality is vital for our health and well-being, and for the durability of our household equipment.

# The complete solution

You no longer have to choose between water that's good to drink and water that doesn't deposit scale.

Komeo is the **only solution** that combines all the essential functions for treating water, everywhere in your home.

It provides high quality water, ideal for everyday consumption and common household usage, while also protecting your pipes and household electrical appliances.

FUNCTIONS	FILTRATION SOLUTIONS: Jugs and filter cartridges	SOFTENERS	komeo
PROTECTS pipes and household appliances from limescale	-	●	●
REMOVES the bad taste of chlorine	●	-	●
ENSURES optimum drinking water quality	●	-	●
GUARANTEES water with no bacteria or viruses	-	-	●
FILTERS OUT pesticides and herbicides	< <sup>(1)</sup>	-	●
TREATS heavy metals and manganese	< <sup>(1)</sup>	-	●
REDUCES nitrate content	< <sup>(1)</sup>	-	●
ENVIRONMENTALLY-FRIENDLY without chemical treatment or salt rejection	●	-	●
DETECTS network leaks	-	-	●
WIFI remote control	-	-	●

<sup>(1)</sup> Treatment level according to type of filtering solution

# Well-being

Komeo significantly improves water quality while maintaining its original mineral content and thus its natural benefits.

It contributes to the long-term well-being of the entire family, and enhances comfort for washing, cooking and cleaning dishes.

By eliminating bacteria and pollution, Komeo provides optimum quality drinking water, ready to drink, throughout the entire house.

Komeo conserves the mineral content of water (calcium, magnesium, etc.), which is good for health.

# Protection

The electronic descaling system neutralises scale, thus protecting the entire household water system.

The unit detects leaks and excess pressure, and automatically shuts down the network if necessary, while also informing the user.

## Savings

Komeo is an **alternative to purchasing bottled water**, without having to lower your requirements in terms of safety and taste.

**Electricity consumption varies according to the amount of water to treat.** You only pay for the water that you actually consume.

By descaling the installation, **Komeo significantly extends the service life** of your sanitary appliances (pipes, boiler, taps & valves, etc.) and household electrical equipment.

It also reduces the use of cleaning products: washing powder, softeners, descaling substances.

### DID YOU KNOW?

#### KOMEO DETECTS LEAKS

- Leaks represent 15 to 20% of annual household water consumption
- A dripping tap represents 4 to 5 litres per hour, i.e. 35 to 44 m<sup>3</sup> / year

# Ecology Environment

Komeo is an environmentally-friendly solution, with no chemical treatment or salt rejection.

Unlike softeners, Komeo does not waste any water through regeneration cycles.

## THE ALTERNATIVE TO PURCHASING BOTTLED WATER:

- Save almost 2,000 bottles per year, for a family of 4 people, each drinking an average of 2 litres of water per day.
- No transport, no packaging.

# Practical A turnkey solution

COMAP WT solutions are proven and acknowledged by specialist distributors of sanitary equipment and plumbing/heating installation specialists.

These experts will be able to advise you and install your system in accordance with professional practices and standards.

**Komeo can be installed very quickly, by a specialist, who will also be able to manage maintenance, for a turnkey solution.**

**With an attractive and compact design, Komeo can be installed against a wall or under a sink\*.**

**The Komeo touch screen makes the system easy to configure, with clearly displayed information.**

\* Depending on the model of sink

# Connected

The Komeo application for tablet and smartphone allows water consumption to be monitored in real time.

Komeo can be configured remotely through your Wi-Fi network.

You are automatically informed of any system malfunction (wear status of consumables, leaks, excess pressure, etc.).

# komeo

## A COMAP Water Treatment innovation

The enhancements of the Komeo water treatment unit are the direct result of COMAP Water Treatment expertise in the development of water treatment systems.

For more than 30 years, COMAP Water Treatment solutions have been reputed as meeting the most stringent requirements in terms of water quality.

The entire COMAP Water Treatment product range is designed, manufactured and inspected on our ISO 9001-certified industrial site in Montélier in the south of France.

## Professional treatment throughout the home

### + ELECTRONIC DESCALING

- Protects pipes and household electrical appliances from scaling

### + TWO ACTIVATED CARBON FILTERS

- Filter out pesticides and herbicides
- Treat heavy metals and manganese
- Reduce nitrate content
- Remove the bad taste of chlorine

## + SELF-CLEANING PREFILTER

- Traps sediment and particles suspended in the water.
- Automatic purge, without removing the cartridge. Can be remotely activated through the power-valve.

## + INTERACTIVE TOUCH SCREEN

- Real time information: water consumption, wear status of consumables, malfunctions, etc.
- Can be controlled from a tablet or smartphone

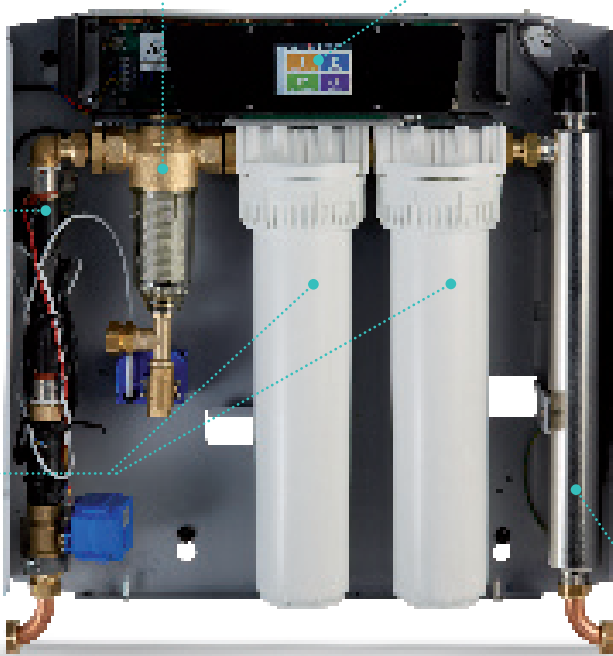

## + UVC LAMP

- Neutralises bacteria, viruses, mould and fermentation, and prevents the development of legionella in water networks.

## + SAFETY SENSORS

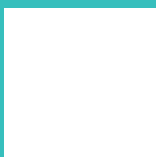

- Detect leaks and excess pressure, and automatically cut off the network if necessary
