

GOT LIMESCALE?

GET SESI®

The Sentinel solution for long lasting, whole house limescale protection

Limescale build-up inside household appliances and heating systems can cause them to run less effectively, increases the likelihood of premature breakdown and impairs the efficiency of heat transfer.

Sentinel SESI is a cost-effective electrolytic scale inhibitor solution to help tackle limescale build up and could save money on energy bills. Easy to fit in-line on the incoming water main, SESI is non-magnetic, requires no power supply or chemicals, is non-polluting, totally maintenance free, and has a 5 year guarantee.

- **Meets requirements of PART L (importance of controlling the build up of limescale)**
- **WRAS approved**
