

SENTINEL®

Eliminator Vortex500

Filter for powerful
magnetic filtration
of system debris

**10 YEAR
GUARANTEE**

Sentinel Eliminator Vortex®500 is the perfect filter solution to guard against circulating heating system debris.

Why use Eliminator Vortex500?

Fast installation

- Large debris collection capacity suitable for high flow rates.
- In-line installation with 360° positionable T-piece enables installation in minutes on to a variety of pipework orientations.

Simple servicing

- Withdraw magnet and flush clean in seconds.
- Remove collar and withdraw magnet assembly to show collected debris and clean: no tools required.

Confidence

- 10 year total product guarantee.
- Dual seals are pressure tested on every single unit.
- Collects both magnetic and non-magnetic types of damaging debris.

Use Eliminator Vortex500 as part of The Sentinel System best practice approach to water treatment:

Clean with X800
Fast Acting Cleaner

Protect with
X100 Inhibitor

Maintain with
X100 Quick Test

Premium performance

The Eliminator Vortex range combines powerful magnetic filtration and our unique Vortex Core to deliver effective retention of circulating system debris.

- 
- 1 Unique Vortex Core** reduces water turbulence, aids debris retention and ensures that the filter will never block.

- 2 Powerful magnet assembly** with 9000 Gauss field to filter damaging magnetite sludge.

- 2 Dual seals** for ultimate confidence.

No ordinary system filter

Powerful magnet assembly

9000 Gauss field

360° positionable T-piece with quality brass valves

Secure and flexible fitting to pipework

Dual seals

For ultimate confidence

Robust design

Manufactured to automotive standards with GRP body

Anti-tamper drain valve

Enables fast servicing

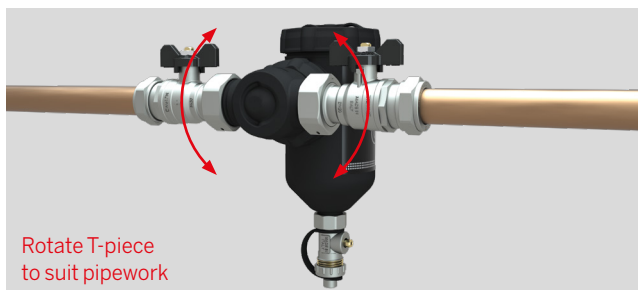

10 year guarantee

Our filters are engineered and tested to meet the same exacting standards we've demanded of our products since 1988

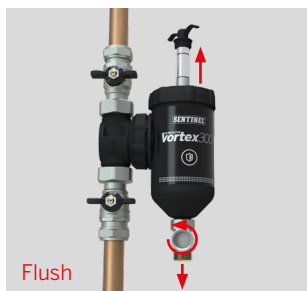

Minutes to install, seconds to clean

Save time on site with in-line installation and 360° positionable T-piece, which allows easy fitting onto many different orientations of pipework.

For servicing and cleaning, simply withdraw the magnet and flush via the anti-tamper drain valve.

Alternatively, to show collected debris, unscrew the top of the filter and clean.
